RÉMI SEEBERG

UX DESIGNER

Welcome to my interactive CV.
Find out more about me and my professional career on the following pages.

RÉMI SEEBERG

ABOUT ME

Hello my name is Rémi,

I'm a UX designer with home base in cosy little Ingolstadt in the south of Germany. I like aesthetic products, creating concepts from scratch and finalising them. I enjoy trying new things, getting in touch with people who have a different mindset or cultural background and exchanging ideas with them. I enjoy taking on challenges that are new to me.

For my second career, I decided to combine my previous technical experience with my affinity for design and start studying to become a user experience designer. I completed this in 2018 at the Technische Hochschule Ingolstadt. Afterwards I supported the innovation department N3XT at MediaMarktSaturn Retail Group for 5 years in various areas of UX such as user re-search, trend identification, concept creation, product design, all kinds of creative processes in various projects and project management tasks.

I worked as a product designer at maloon GmbH and was jointly responsible for the further development of the SocialHub customer software.

As a lecturer, I had a teaching assignment for Human-centred Design and Speculative Design at the Technische Hochschule Ingolstadt, where I also represented my former company.

- Quality management

RÉMI SEEBERG

SKILLS

As a UX designer, I develop alternatives to existing processes and solutions for specific requirements that make it easier for customers to use digital products. I am familiar with approaches such as Human-centred Design and Design thinking and many associated methodologies and am able to communicate and apply them. In subsequent processes, I visualise the developed concepts, discuss the design with the developers, review and evaluate them based on metrics and user research.

Based on my many years of experience in the field of innovation, I have a high technical understanding of new technologies and have also taken on smaller projects as a project manager.

HOBBYS

Over the years, you develop a number of passions for things you like to spend your time on. Where some interests have a short half-life, others last for a longer period and deserve to be called a hobby sooner or later. Here are a few of the pursuits that have made it into the illustrious circle:

GAMER

As a 1st generation console child, I have remained true to this passion to this day.

PHOTOGRAPHY

During my studies I enjoyed trying out the camera and using it on different occasions.

SPORT FANATIC

Sports enthusiast is the right word for me. When I'm not doing sports myself, I'm interested in almost all kinds of sports.

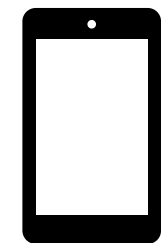

TRAVELLING

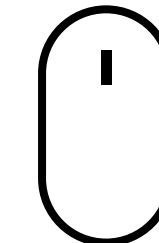

When it comes to beach and sea, you don't have to ask me twice. Add to that other cultures and good food - perfect!
